AUDIT

Usability

6 issues · 0 critical · 0 major · 5 minor · 1 suggestion

The website features a clean, modern aesthetic with a strong professional brand. While the visual hierarchy is generally effective, there are opportunities to improve the grouping of related elements in the project grid and to standardize iconography for better consistency.

Consistency 2

1. No consistent type scale

Minor

14 distinct font sizes (aim 10 or fewer)

TRY

Define a fixed type scale (e.g. 12/14/16/20/24/32px) and map every text style onto it.

Found 14 distinct font sizes (a tidy interface usually stays under 10). Too many suggests no shared system and a less cohesive feel.

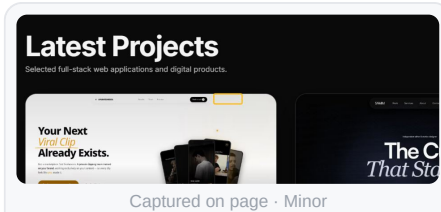

2. The site uses multiple different arrow styles for similar 'proceed' or 'external link' actions: a simple diagonal arrow in project links, a right arrow in pricing buttons, and a circled diagonal arrow for the 'View all my projects' button.

Minor

"View Project"

TRY

Standardize on a single arrow icon style for all navigational and call-to-action buttons to improve visual cohesion.

Grouping

1

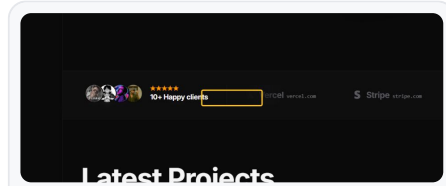

3. In the 'Latest Projects' grid, the project title and the 'View Project' link are positioned at opposite horizontal ends of the card container. This wide separation weakens the visual connection between the project name and its primary action.

Minor

"Apurvix Media"

TRY

Move the 'View Project' link closer to the project title or align both to the same side to create a stronger visual group.

Density

1

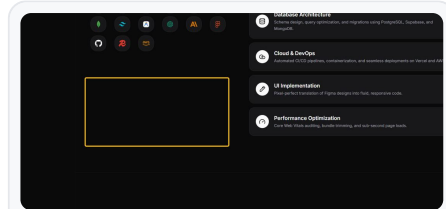

4. The 'My Tech Stack' section displays a cluster of 12 small icons without text labels. While some are recognizable, others may be ambiguous to non-technical clients, requiring them to guess the meaning of the symbols.

Minor

"MY TECH STACK"

TRY

Add small text labels below or beside the icons to ensure clarity for all users.

Spacing & alignment

1

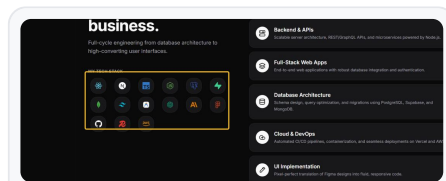

5. The 'Services' section has a significant layout imbalance; the left column (heading and tech stack) is much shorter than the right column (list of seven services), resulting in a large amount of dead vertical space on the left.

Minor

"Services that supercharge"

TRY

Reorganize the layout to better distribute content, perhaps by moving the tech stack to a full-width row or adjusting the column widths.

Captured on page · Minor

Hierarchy

1

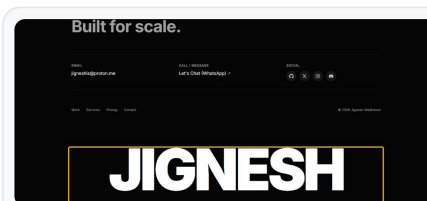

6. The oversized 'JIGNESH' branding in the footer is disproportionately large, drawing significant attention away from the actual functional footer links and contact information.

Suggestion

"JIGNESH"

TRY

Reduce the scale of the footer branding so it serves as a signature rather than a dominant focal point that competes with navigation.
